Hi Valois,

I'm just off today, but can look at it for a bit. If we call ND we should do it together to avoid confusion in case they have some details a little funky.

Thanks,

Chris

Subject: Questions about Title V air permits

Hi Christopher,

I located the DENR Air Program document for Powertech's air permit application. The cover letter states:

Powertech is not required to obtain an operating permit because Powertech does not have the potential to generate more than 25 tons per year of any criteria pollutant, 10 tons per year of a single hazardous air pollutant or 25 tons per year of any combination of hazardous air pollutants.

The Statement of Basis for Title V Air Quality Operating Permit is attached to the cover letter which goes through all the analyses the DENR performed.

Page 7 of the SOB (page 9 of the attached pdf) states:

*Powertech is considered an existing non-PSD source due to air emission and operational limits **in their existing Title V air quality operating permit.***

Ex. 5 Deliberative Process (DP)

Any light you could shed on this would be helpful.

Thanks!

Valois
